Art Unit: 3751

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 7, 9-12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Masuda et al. As stated in paragraphs 92, 99, 17 and 18, Masuda discloses a liquid discharge apparatus that includes a voltage control device 4 and 6, that changes the driving voltage value by increasing the voltage value based on an increase in the number of nozzles used as claimed. In regard to claim 3, Masuda controls the voltage between two positions, full voltage or zero voltage, i.e. on or off. The rejected claims do not define how much or what type of change is being defined, or if the change is over a range.

3. Claims 1, 3, 7-12 and 15-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Shigemura. As stated in paragraph 145, Shigemura discloses a liquid discharge apparatus that includes a voltage control device 1801, that changes the driving voltage value based on the movement and position of an adjacent nozzle as claimed. As noted in the title and the Abstract Shigemura discloses a method and apparatus for manufacturing a panel display device.

Art Unit: 3751

4. Claims 13, 14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
